I think that works great.

Thanks

John

Subject: Policy Updates

John,

While we have Policy 3-300 open to change Radiological Health to Radiation Safety, I would like to make an additional edit. Specifically, I propose to strike Occupation and Environmental from the title making the Policy simply 3-300 Health and Safety Policy. That title more accurately reflects the nature of the policy. Occupational and Environmental unintentionally limit its application. I know, I originally named this policy. I'd like to rename it.

A response from you to this email will suffice for me to move this change forward (or not).
